

## **THE UNIVERSITY OF ADELAIDE**

**Department of Mechanical Engineering**

February/2002

Dear Peng,

It gives me much pleasure to inform you of my decision to include the elabtronics bitset / elab development kit as part of our curriculum. This kit represents a great advance in the field of microcontroller programming. It will prove to be a valuable aid to mechanical and mechatronic engineering students in the department of mechanical engineering.

The field of microcontroller programming, as you are aware, is quite challenging. Your icon-based programming software provides a useful tool in reducing complexity while also allowing for more rapid skill development.

Students will be using your kit for their project work and it will also be used as an aid in some courses.

Yours sincerely,

Dr. Tien-Fu Lu  
Department of Mechanical Engineering
